

CKC AT-A-GLANCE

Research

In 2024, CKc invested **more than \$1 million** in research grants including **\$650,000** awarded to new projects to be paid out over the next three years. Grant cycles open annually in March. All the information here is from the most recently completed grant cycle.

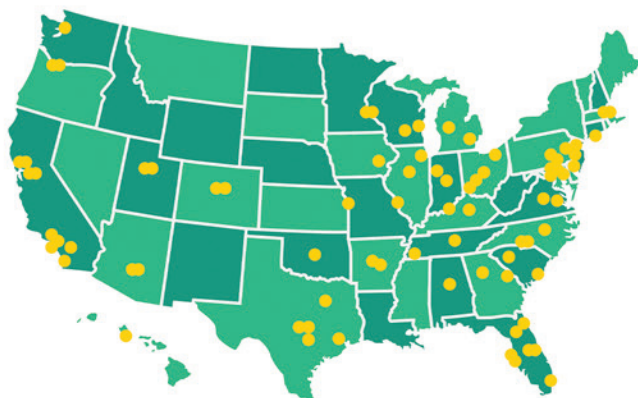

Dr. Michelle Monje-Deisseroth
Stanford University

Dr. Giselle Saulnier Sholler
Penn State University College of Medicine

Dr. Allison O'Neill
Dana-Farber Cancer Institute

Dr. Anirban Das
SickKids Toronto

● Calgary	AB	● Ottawa	ON
● Edmonton	AB	● Toronto,	ON
● Vancouver	BC	● Montreal	QC
● Hamilton	ON	● Quebec	QC

Research Sites Outside North America

- Glasgow, Scotland
- Zurich, Switzerland

The 2024 grant cycle saw a rigorous selection process, with 44 Letters of Intent (LOIs) submitted, 17 full applications reviewed by CKc's Scientific Advisory Board (SAB), and ultimately, four projects chosen for funding based on their scientific merit and potential impact. This meticulous process ensures CKc supports the most promising research avenues in the fight against childhood cancers. To view a full list of CKc-funded research, visit our website, [cannonballkidscancer.org](https://www.cannonballkidscancer.org).

**CANNONBALL
KIDS' CANCER**

CKC AT-A-GLANCE

Education

Pediatric cancer isn't just a statistic—it's real kids, real families, and a fight that needs all of us. In 2024, CKc launched *Game Over: c*ncer*, a podcast bringing together the voices of those on the frontlines—families sharing their journeys, researchers pushing for breakthroughs, and donors making hope possible. By telling their stories, CKc shines a light on the urgent need for funding, innovation, and support. Because when we all play our part, curing childhood cancer isn't just a dream—it's a goal we can reach.
